Here is a perfect opportunity to connect with them in their space, help them to expand their business knowledge, and maybe even learn a few things from them. It is OK if you have never used Instagram (we hadn't until a year ago). Here is your opportunity to learn a little bit and have the knowledge to set your kids free on an awesome Social Media Experience. The goal is for your students to become the experts on your city or town through Instagram. We will share with you a profitable Business (not ours) and our vision of how we think that you can get there. Once the students establish themselves as "hub" of your city then people will start looking to them for what is relevant in the area and ultimately someday create an Instagram page that creates revenue through paid content. We will provide you with the tools and templates that we have used to develop our plan. You can feel free adjust and listen to your students to create your own prosperous Instagram Pages!!!</p>
